

## **Place of items storage in the E-catalogue at the Research Library of the Tomsk State University**

Place of items storage is the location of an item in one of the subdivisions of the Research Library, of the University or of other organisations. The place of storage is shown in the facet of the E-catalogue (navigation block on the left), where the names of the subdivisions are arranged in alphabetical order, with the total number of items at the given place of storage.

Books stored on **the delivery desk, in the reading rooms, in the Bibliographical Information Centre**, are available *at the place of storage*. To get the book, you need to specify the author, the title of the item and the shelf index and ask the librarian of the specified subdivision.

You need to make a request (electronic or handwritten) to get books from the **book depository**.

Books with the location of the **Faculty Library or other organizations and libraries of Tomsk** can be obtained at the location of the departments/organisations in their working hours.
