

New acquisitions of printed editions by Research Library of Tomsk State University

The library stock is regularly updated and replenished with editions purchased from publishing houses and donated ones.

New editions are purchased upon teachers' requests. You can fill in the online application to purchase a new edition via "**Request a book purchase for the Library**" section.

In the library, a new edition initially goes to the Department of Acquisition and Cataloguing. The item delivery cycle takes up to three weeks. Dissertations approved by the Dissertation Council of TSU and submitted to the Library are processed within three days.

After processing, some new editions are moved to **Exhibition of New Acquisitions** at the Professors Reading Room.

Dissertations and abstracts, materials of Rare Books and Manuscripts Department, and removable media information (CD, DVD) aren't exhibited. The exhibition is updated every two weeks. The latest editions are at free access. After that the exhibited items are moved to their constant place of storage. At the Reading Room, new items go to its exhibition and then to their shelf in accordance with their shelf index. The E-catalogue is updated with the information about new acquisitions. To view the latest items first, sort them by "Recently added items first". To check new acquisitions daily, you can also employ RSS-option (Mozilla Firefox browser), the RSS icon is located at the top of the catalogue page.
