P. 14 *Belyaev Yu. A.* **Labour activity behind the pension threshold: in expectation of changes**

In connection with life expectancy increase there was a problem of continuation of normal existence and high-grade participation in labour activity, a public and political life of older persons, according to the age specifications operating today, carried to a category of unearned age. Today all elements of an infrastructure of a life are focused on creation of conditions for a high-grade life only one dominating generation, a consequence of that is age discrimination. Meanwhile, the requirement of existence equal in rights is shown already, at least, by two generations. A creative way out – creation of a new infrastructure of a life for many generations simultaneously.

**Key words:** age restrictions, protection of the labour rights of older persons, updating of knowledge, life expectancy, the work organization at a pension age, reservation of working and educational places.

P. 19 *Azarova A. I.* Tomsk State University. **Issues of an projects investment appeal estimation of the oil and gas company**

The oil industry being the part of world economy and world market combines into a whole three main technological and market chains: so-called "upstream" – the exploration and production of raw materials; "midstream" – the transportation by marine and pipeline transports and "downstream" – the refining, marketing and sale of oil products. The fuel and energy cycles structurally divide into few technological and market chains each of which has the certain functional content. On this basis it is necessary to have a deal with few groups of the main indexes and coefficients used for numerous calculating formulas for calculation of the industry's basic figures characterizing its situation, effectiveness, profitability, risks and so on. All stages are enough contradictory in the conditions of IFRS (International Financial Reporting Standards).

**Key words:** estimation of principles, investments, oil production, contradiction of accounting, accounting, IFRS (International Financial Reporting Standards).
